

Online Survey Invitation

4SIM – Scalable Socio-Technical System Simulation in Manufacturing (Erasmus+)

About the Project

4SIM is an Erasmus+ initiative developing an innovative learning platform that combines traditional and generative-AI-based simulations. It supports training in key manufacturing areas such as:

- Safety
- Lean Production
- Human Factors
- HSEQ Management

Why This Survey?

We are gathering insights on **current and future training needs** in the manufacturing sector. Your input will help us:

- Identify essential skills in modern manufacturing
- Understand current training gaps
- Prioritize future training needs
- Inform the design of AI-driven simulation scenarios

Who Can Participate?

Manufacturing professionals and educators, including:

- Quality Managers
- Safety Engineers
- Production Supervisors
- HSEQ Officers
- Manufacturing Engineers/Operators
- University Educators

Participation is voluntary, and the survey adapts questions based on your profile.

Data Protection

- No personal data required
- Secure storage of responses
- Results reported anonymously
